

*Do you have trouble
reading your
prescription labels?*

*Now there's a
solution!*

Braille Labels

How does it work?

The pharmacy will attach a clear Braille overlay on top of the printed label on your prescription container. This gives you the opportunity to easily identify your medications. Extended information is also available via a talking label.

How do I get Braille labels?

Talk to your pharmacist today. They can help you get started with Braille labels.

What does it cost?

There is no additional cost to you for this pharmacy service. This is a **FREE** program!
