

*Controlled substances  
are a **BIG** deal.*

*The solution that  
improves your safety  
is here.*

**Controlled Substance  
Safety Labels**

# What is a Controlled Substance Safety Label?

A Controlled Substance Safety Label (CSSL) is an auxiliary label used to distinguish controlled substances from other drugs, and to provide a quick, visual reference of instructions and warnings. Scanning the QR code opens a short and easy-to-understand safety video.

- ***Reinforce Patient Safety***
- ***Large Print, Booklet-Style Labels Ensure Readability***
- ***Safety Videos Linked Via QR Code***

CSSLs are part of ScriptView, one of the solutions offered in the ScriptAbility prescription labeling system.
